

How to Access Google Classroom

To access Google Classroom, start by going to the Google Classroom website. To do this, open your usual browser (Chrome is recommended for Google Classroom) and search Google Classroom. Click on the top search results to go to Google Classroom and you will be taken to the sign in page

On this page, you can login using your child's Google Classroom login. Their login information is contained in their login sheet which was given out earlier in the year. If you have lost the login details and need a replacement one, please speak to your child's class teacher.

In the first box, type in their username. This will be in the format of the letters from their surname, first initial, a set of numbers then followed by .305@nestschools.org

Make sure the full username is typed in and that there are no spaces.

Once you have entered your username, click Next. You will then be asked to enter your password, which again can be found on your child's login sheet. Click Next again to login to Google Classroom.

When you have logged in, you will be able to select your class.

Click here to open your Google classroom and to access the work that has been set by your child's teacher.

Trouble shooting

Make sure the login is accurate and is using @nestschools.org with no spaces

Make sure that you have not confused 0 and o

Make sure you have logged out of any other Google accounts before logging in as this can interfere with the login process.
